The **AG-969** is a **top rated** wall mount light trap with 100 watts of U.V. light attraction. Flying insects are electrocuted on an internal grid and dropped into a removable tray, allowing easy access for evaluation, identification, and disposal. Ideal for aggressive control in sensitive areas. **USDA studies show the 100 watts of U.V. light output provides optimum fly attraction.** Install light 3-6 feet high on the wall.
